

Nathan Ivor Sequeira

Date of birth: 01/12/2003 | **Nationality:** Indian | **Gender:** Male | **Email address:** nathansequeirade@gmail.com |
Website: <https://nathansequeirafinal.vercel.app/> | **Address:** India (Home)

● ABOUT ME

BCA graduate with 1+ year of experience supporting hosting infrastructure and VPN server environments, including DNS configuration, VPS systems, and server monitoring. Developed independent full-stack and AI-enabled applications, integrating APIs such as OpenAI and Google Gemini using frameworks including LangChain and Next.js. Seeking a Master's in Computer Science to deepen expertise in backend systems, distributed architectures, and secure infrastructure.

● EDUCATION AND TRAINING

19/10/2021 – 22/05/2024 Mangaluru, India

BACHELOR OF COMPUTER APPLICATION St. Aloysius College (Autonomous)

Studied core areas including Data Structures, Algorithms, OOP (Java, C, C++), Database Systems, Operating Systems, Computer Networks, AI & Machine Learning, Software Engineering, and Mathematics (Linear Algebra, Probability, Statistics).

Final grade CGPA: 6.84/10 — German equivalent: 2.5 | **Level in EQF** EQF level 6

● WORK EXPERIENCE

JUNIOR SUPPORT ENGINEER - BLUEHOST – UNIFYCX – 04/07/2024 – 19/03/2025 – MANGALURU, INDIA

- Resolved **60+ technical support tickets per shift** covering hosting, email, DNS, and website security issues across shared and VPS environments using cPanel, WHM, and Grafana.
- Performed **website security fixes, patch applications, and email delivery troubleshooting** for client websites via cPanel, WHM, Zendesk, and Linux-based tools.

JUNIOR ASSOCIATE - OPERATIONS - TECHNICAL SUPPORT – UNIFYCX – 20/03/2025 – 04/11/2025 – MANGALURU, INDIA

- Handled **40–80 VPN support tickets per shift**, resolving connectivity issues, monitoring server load, and coordinating workarounds using Zendesk and Okta.
- Served as **designated QA tester** for the team; commended by management as a highly motivated self-starter with strong technical knowledge throughout the tenure.

● SKILLS

Team leadership and coordination | Peer mentoring | Technical documentation | Problem-solving

Programming Languages

Java | SQL | JavaScript | Python | C and C++

Systems & Networking

Computer Networking | DNS Configuration | Linux | Operating Systems

AI & Machine Learning

MediaPipe | OpenCV (project-based experience) | Google Gemini Pro | OpenAI API | LangChain

Web Development

React JS | Next.js | HTML5 | CSS3 | Tailwind CSS | PHP

Databases

MongoDB (beginner) | MySQL

Tools & Platforms

GitHub | Git | Grafana | WHM | cPanel | Zendesk | PyCharm

PROJECTS

17/12/2025 – 03/01/2026

Multi-Chain Fast Food Nutrition Analysis System (Next.js, React, Tailwind — 2026)

Developed a full-stack responsive web application aggregating real-time nutritional data across multiple restaurant chains using JSON-driven API simulation and mobile-first design.

Live Link: <https://multi-chain-fast-food-nutrition-ana.vercel.app/>

GitHub Link: <https://github.com/Nathan-sudo-pycharm/Multi-Chain-Fast-Food-Nutrition-Analysis>

23/11/2023 – 13/12/2023

MultiPDF Chat Application (Python, LangChain, OpenAI, Pinecone)

Built a Retrieval Augmented Generation (RAG) application enabling natural language querying across multiple PDF documents using LangChain, Pinecone vector store, and OpenAI embeddings.

GitHub Link: https://github.com/Nathan-sudo-pycharm/Pdf_reader

10/01/2024 – 03/05/2024

Autonomous Obstacle-Avoidance Robot (Embedded C, Arduino — Final Year Project)

Designed and built a fully autonomous navigating vehicle implementing real-time obstacle detection using ultrasonic sensors and a directional decision algorithm over 4 months.

Adapted original line-following design mid-project due to sensor constraints, demonstrating real-world engineering problem-solving under academic supervision.

CERTIFICATIONS

Honeywell & Palo Alto Networks, 31/10/2023

Honeywell Cybersecurity Training (Grade A)

Completed certification covering cybersecurity fundamentals, firewall operations, and cyber attack prevention strategies. Training delivered by Honeywell and Palo Alto Networks at St. Aloysius College.

Palo Alto Networks, 31/10/2023

Cloud Security Fundamentals — Palo Alto Networks

Completed foundational training in cloud security principles, covering threat detection, network security, and cloud infrastructure protection.

Additional Achievements

Won multiple inter-collegiate IT product demonstration and showcase competitions, pitching original technical projects to panels across St. Aloysius College, St. Joseph's Engineering College, and Rosary College of Commerce and Arts. Additional recognitions include Certificate of Excellence, Certificate of Appreciation, and Hackathon Participation at St. Aloysius College.

LANGUAGE SKILLS

Mother tongue(s): HINDI
